First Quarter 2025 Released April 2025

Los Angeles Auto Outlook

FORECAST

Outlook for 2025 is Clouded Due to Tariffs

Below is a review of key trends in the county new vehicle market.

Market got off to a good start in First Quarter of this year

County new retail registrations increased 4.3% in the First Quarter of 2025 versus a year earlier, in line with the 4.9% improvement in the state.

Outlook for rest of year is clouded

Pent-up-demand, combined with improvements in affordability were expected to propel the market in 2025. However, the potential overhaul of U.S. trade policy has added significant unknowns into the new vehicle sales outlook. The sidebar on the right presents three forecast scenarios for county new vehicle registrations this year, incorporating varying assumptions for tariff policies and economic outcomes. After the events of the past few weeks, it's safe to say that things are likely to change, so stay tuned.

Tesla suffers losses in county market

Tesla registrations in the First Quarter of this year fell 14.0% versus year earlier, while registrations for all other BEVs increased 40%. Tesla's share of the county electric vehicle market fell from 55% in 1Q '24 to just 43% this year. An aging product lineup and backlash against Elon Musk's political initiatives are key factors in the decline.

Toyota is strong performer in county Small SUV segment; Mercedes stands out among Mid and Full Size Luxury SUVs

As show on page 4, Toyota accounted for 20.7% of the county Small SUV segment, well above its 14.3% share in the Nation. Mercedes was a relatively strong performer in the Mid and Full Size Luxury SUV segment.

Outlook for Los Angeles County New Vehicle Market

There is heightened uncertainty for the new vehicle sales outlook in 2025. Some tariffs were dialed back in early April, but automotive and raw material tariffs are still in place, and the trade scenario is far from settled. Below are three scenarios for the forecast incorporating varying assumptions for tariffs and economic outcomes.

Baseline Forecast

Key assumptions: tariffs are scaled back somewhat from current rates but remain above prior levels; vehicle prices increase by no more than 5%; minimal interest rate cuts by the Fed; inflation drifts higher; and economic growth slows.

Forecast: 416,300 units, down 2.8% vs. '24

Alternative Upside Forecast

Key assumptions: tariffs are largely removed and revert to prior levels; vehicle prices remain stable; several interest rate reductions by the Fed; inflation eases; and economic growth improves as the year progresses. This is similar to the forecast projection in January of this year.

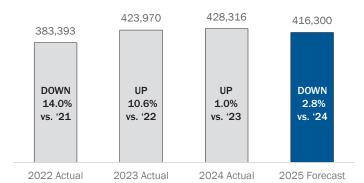

Forecast: 439,000 units, up 2.5% vs. '24

Alternative Downside Forecast

Key assumptions: tensions escalate and tariffs are increased; vehicle prices surge by roughly 10%; no interest rate cuts; inflation accelerates; and the economy enters recession.

Forecast: 385,900 units, down 9.9% vs. '24

Forecast for County New Retail Light Vehicle Registrations

The graph above shows annual new retail light vehicle registrations from 2022 through 2024, and Auto Outlook's baseline projection for 2025. Historical data sourced from Experian Automotive.

Market Summary

	YTD '24	YTD '25	% Chg.	Mkt. Share
	thru Mar.	thru Mar.	'24 to '25	YTD '25
TOTAL	102,847	107,219	4.3%	
Car	32,368	31,730	-2.0%	29.6%
Light Truck	70,479	75,489	7.1%	70.4%
Domestic	28,137	27,905	-0.8%	26.0%

QUARTERLY RESULTS

Los Angeles County Quarterly Registrations

Seasonally Adjusted Annual Rate, Converted to Equivalent U.S. New Vehicle Market SAAR (millions of units)

Data sourced from Experian Automotive. SAAR estimates: Auto Outlook.

% Change in registrations vs. previous quarter (1Q '25 vs. 4Q '24) UP 0.5% The graph on the left provides an easily recognizable way to gauge the strength of the county market. It shows quarterly registrations based on seasonally adjusted annual rate. These figures are then indexed to SAAR sales figures for the U.S. new vehicle market. So just like in the national market, when the quarterly SAAR is above 17 million units, the county market is strong, 15 million is about average, and below 13 million is weak. Equivalent SAAR levels in the county increased from 15.2 million in the Fourth Quarter of 2024 to 15.3 million in the First Quarter of this year.

At Auto Outlook, we strive to provide sound and accurate analyses and forecasts based upon the data available to us. First Quarter 2025 Page 3

KEY TRENDS IN LOS ANGELES COUNTY NEW VEHICLE MARKET

LONG TERM TRENDS

Annual New Retail Light Vehicle Registrations in County Market - 2015 thru 2024

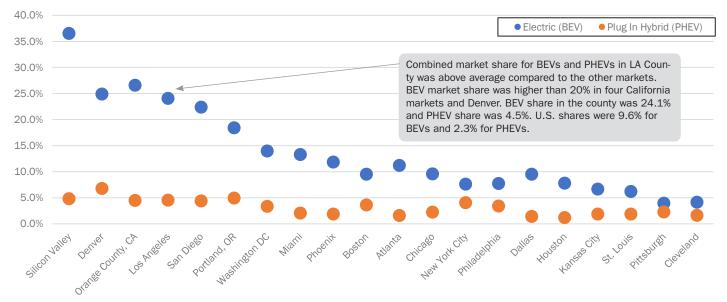

The graph on the left shows annual new retail light vehicle registrations from 2015 thru 2024. The grey bars show the actual totals in each year. The blue line represents average registrations between 2015 and 2019 and the orange line is the average between 2020 and 2024. The pandemic and subsequent supply chain issues in 2022 clearly took a toll on the market. Average registrations between 2020 and 2024 were 418.110 units, well below the previous five year average of 523,292. Postponed purchases that accrued during the past five years should provide some support for the market in 2025.

COMPARISON OF METRO AREA MARKETS

BEV and PHEV Share in Selected Metro Area Markets - YTD 2025 thru March

Markets are shown from left (highest) to right (lowest) based on combined BEV and PHEV market share. Data sourced from Experian Automotive.

BRANDS AND MODELS

TOP SELLING BRANDS IN 7 PRIMARY SEGMENTS

The seven graphs on this page show brand market share in seven key segments during the first three months of 2025 in both the Los Angeles County and U.S. markets. County percent share is depicted by the red bars, U.S. share is light gray. Top ten brands in each segment are ranked from top to bottom based on Los Angeles County share.

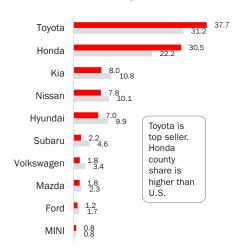

Segments were defined based on model classifications instead of overall brand positioning. For instance, Chevrolet appears on the Luxury and Sports cars graph because of the Corvette. Small SUVs consists of both Sub Compact and Compact models.

BRANDS AND MODELS

The graph below shows both the percent and unit change in registrations during the First Quarter of this year versus year earlier. Comparing the percent change in registrations is helpful for establishing the relative change in results, but it can be misleading since it doesn't take into the account the absolute level of registrations. As shown below, Acura posted a big percentage improvement in the First Quarter (up 66%, blue bar) but the unit increase was relatively small (up by 473 units). Toyota's percentage increase was smaller than Acura (up 9.3%), but the unit total improved by more than 1,500 units.

ALTERNATIVE POWERTRAIN MARKET

FIVE KEY TRENDS

BEV share was 24.1% in 1Q '25, up vs. year earlier, and up slightly from 4Q '24.

Hybrid vehicles continued to post gains. Hybrid share was 18.5% in 1Q '25, up 5.2 points vs. year earlier.

Tesla registrations declined 14% so far this year. BEV sales by franchised dealerships increased 42% vs. year earlier.

Ford, Chevrolet, and Hyundai posted big gains in the BEV market so far this year vs. 2024.

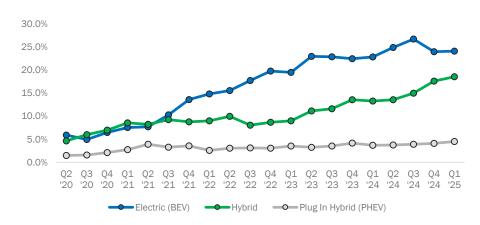

Toyota hybrid registrations increased by 50.7% in 1Q

'25 vs. year earlier and market share exceeded 50%.

BEV, PHEV, AND HYBRID MARKET SHARE
